

# Partner with HP for the environment

## HP Papers are designed with the environment in mind

HP's policy is to use fiber from responsibly managed forests. We are working to increase both the percentage of sustainable fiber (per the Forest Stewardship Council® (FSC®)) and the percentage of post-consumer recycled content in HP-branded papers.

## Look for the certification logo on the product packaging

HP has a preference for offering FSC-certified papers. You can help protect the world's forests for the future. Look for paper with FSC and other responsible forestry logos.

## Recycle and make a difference

In addition, you can recycle your paper and packaging. It's easy and makes a big difference. HP Photo Papers are recyclable.<sup>1</sup> Also HP Photo Paper packaging uses 100% recycled content with at least 35% post-consumer recycled content.

For more information, go to: [hp.com/recycle](https://hp.com/recycle)

HP has a strict policy on **responsible and environmentally-friendly** practices throughout the paper lifecycle.

### Footnotes

1. May not be recyclable in your area. For more information, see <https://www8.hp.com/us/en/hp-information/environment/product-recycling.html>
